

IT LEADER - ARCHITECTURE & DIGITAL TRANSFORMATION

Baptiste Calin

baptiste.calin@ik.me Colfontaine — Hainaut LinkedIn (https://www.linkedin.com/in/baptiste-calin-473111440)

Profile

IT professional with **20+ years of experience** in the design, evolution and governance of complex information systems, including more than 15 years in **digital healthcare solutions**.

My background combines **IT architecture, functional analysis, digital transformation, team management, governance, quality, cybersecurity, compliance and continuous improvement**.

At Xperthis/ZORGI, I spent more than a decade contributing to the design and evolution of **electronic patient records and patient portals used by hospitals and healthcare networks**. I worked at the interface between technical teams, business teams and healthcare stakeholders.

I progressively moved into cross-functional responsibilities covering **quality, governance and coordination**, particularly quality management systems, risk analysis, regulatory compliance, KPIs and process transformation.

This profile enables me to connect **institutional strategy, business needs, information-system architecture and operational implementation**.

I am now looking to leverage my experience in a role focused on **IT governance, quality management and digital transformation**. My objective is to contribute to aligning organisational strategy, business processes and information systems through a structured approach to governance, risk management, compliance and continuous improvement. I also aim to support organisational and technological change, strengthen process control and foster a culture of quality, collaboration and sustainable performance.

Key skills

IT strategy & governance

Information systems strategy and governance, Functional and technical architecture, Digital transformation roadmaps, IT process governance, Standards and methods definition, ITIL 4, Quality management and continuous improvement

Management & leadership

Coordination of multidisciplinary IT teams, Team leadership, Team facilitation and support, Training and coaching, Stakeholder management, Business / IT coordination, Change management

Healthcare & hospital information systems

Electronic patient records (EPR), Patient portals, Healthcare SaaS solutions, Clinical team needs analysis, Processes and user journeys, Interoperability and application architecture, Regulated environments

Cybersecurity & compliance

GDPR, ISO 27001, ISO 13485, MDR, DevSecOps, Risk analysis, Security plans, Data protection in healthcare environments

Projects & transformation

Cross-functional project leadership, Functional analysis, BPMN / UML, Agile / Scrum, CI/CD, Process transformation, Automation, Risk management and impact analysis

Performance & quality

KPIs and dashboards, Power BI, QMS / eQMS, ISO 9001, ISO 13485, Continuous improvement, Quality assurance, Audit preparation and follow-up

Professional experience

Software Engineer

WASO

Mons

December 2025 — March 2026

Contributed to the development of a B2B condominium management platform for the Belgian market.

- Technical contribution throughout the project lifecycle, from requirements analysis to implementation.
- Collaboration with stakeholders to understand needs and propose appropriate solutions.
- Contribution to the integration of artificial intelligence solutions into the platform.
- Participation in the migration of the platform to AWS cloud.
- Contribution to the implementation of strong authentication.
- Worked in an environment requiring autonomy, adaptability and collaboration across profiles.

ISO 12207 ITIL 4 Agile/Scrum Jira Confluence

Quality Expert / IT Analyst

Service public de Wallonie (SPW) — Freelance

Namur

April 2023 — September 2025

As part of the digital transformation of the Walloon Public Service, working at the interface between business processes, quality governance, compliance and digital transformation.

- Led the analysis and implementation of a development factory compliant with ISO 12207.
- Mapped and documented business processes using BPMN.
- Standardized application lifecycle management and associated processes.
- Implemented and automated quality controls in development processes.
- Contributed to continuous improvement of processes and deliverable quality.
- Coordinated business stakeholders, project managers, quality teams and technical teams.
- Used indicators and dashboards to monitor process performance and quality.
